Master of Science: Non-thesis Options

Project-only

In Project-only option, students do not need to write a thesis. Only those who are admitted directly into this option at the initial application process are qualified to start and maintain on this track. Students on the project-only track will replace 3 of the 9 Research hours with an elective plus C&PE 825 (3). In the final semester, a project will be assigned under the guidance of a Masters Advisory Committee. The student will plan to present the completed project to their full committee who must unanimously agree that the project has been completed to their satisfaction. This serves as your final project.
